Indications:

Dyspepsia, anorexia, overeating, promotion of digestion, gastric distention due to indigestion and abdominal distention due to post-operative surgery, meteorism, aerophagy, nausea, vomiting, and degassing.

Pharmacokinetics:

Pancreatic enzymes are enteric-coated to minimize destruction or inactivation in gastric acid. Pancreatic enzymes are not absorbed from the gastrointestinal tract in appreciable amounts.

Dosage & Administration:

Adults: Take one tablet three times daily, after meals.

In severe cases: Take two tablets three times daily or as prescribed by the physician.

Contraindications:

Because this drug contains lactose, patients with hereditary problems such as galactose intolerance, Lapp lactase deficiency, or glucose-galactose malabsorption should not take this medicine.

Adverse Effects:

1. Diarrhea, soft stools, nausea, or vomiting, chest pain, difficulty in breathing, palpitations may occur.
2. Discomfort may occur inside the mouth.

Precautions:

1. Follow the dosage and administration mentioned above.
2. If the symptoms are not improved after use for about 2 weeks, discontinue the administration and consult a physician or pharmacist.

Pediatric use:

Do not administer this drug to a child below the age of seven.

Caution on Storage and Handling:

1. Keep out of reach of children
2. Protect from light and store at temperatures not exceeding 30°C.
3. Avoid the abuse of this drug and do not change the container for the quality preservation.
